## PORTFOLIO

Github

Patientor

Live

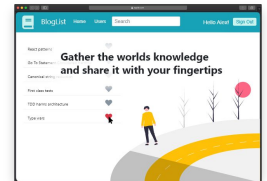

Work in healthcare? Organize your patients and list diagnosis with this web app! This application was built using NodeJS, ReactJS, Typescript, and ExpressJS. It shows knowledge of Typescript features such as Types, Enums, and Interfaces. This application also outlines Form Validation, Proofing Express Requests, State Management and CI/CD Pipelines.

Github

Bloglist

Live

List your favourite blogs! Authenticated and secure, this application was built using NodeJS, ReactJS, MongoDB, ReduxJS, and ExpressJS. It shows knowledge of User Authentication, Routing, Unit testing, End to End Testing, State Management and Production Pipelines

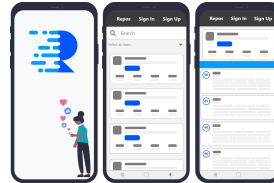

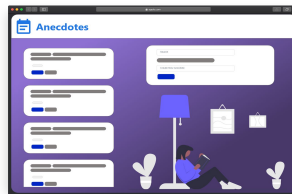

Github

Anecdotes

Live

List your favourite anecdotes in this single-page app! This application was built using NodeJS, ReactJS, MongoDB, ReduxJS, ExpressJS, and many more packages! It shows knowledge of Flux-Architecture, managing States with Reducers, Redux Devtools, Asynchronous Action Creators, and Production Pipelines

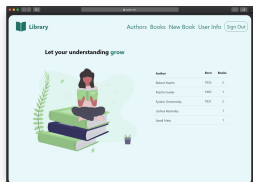

Github

Library

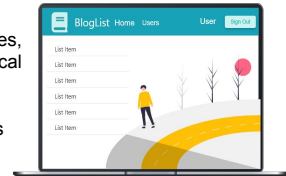

Live

List your favourite books! Authenticated and secure, this application was built using NodeJS, ReactJS, MongoDB, Apollo GraphQL, and ExpressJS. It shows knowledge of Apollo GraphQL Queries, Mutations, Subscriptions, Fragments, and Error Handling. This application also outlines User Authentication, State Management, and Production Pipelines.

Github

Eskobot

A discord bot for use with moderation, logging, games, and much more! Built to support multiple servers, local development, and production deployment. This application outlines the knowledge of building an application based on user feedback. Technologies used are NodeJS, Event Listeners, Refactoring, Sequelize, ES6 Array Methods

## TOOLS

NodeJS

ReactJS

React Native

Typescript

Apollo

GraphQL

ExpressJS

ReduxJS

Jest

Cypress

Sequelize

MongoDB

## EXPERIENCE

Github Actions

Heroku

HTML / CSS

Digital Ocean

### Responsibilities

- Sourced, ordered, and gathered items for jobs based on quotes, estimates, and customer requests.
- Oversaw inventory and servicing of products related to Fire Protection
- Handled sales of customer accounts of varying levels in price and importance
- Managed shipping and receiving of orders from vendors and orders to customers
- Took part in assisting installation and inspection of Fire Protection products on multiple job sites and locations

### Some Business

Parts / Inside Sales

Jan 01 2020 - Present

### Independent Tile Contractor

Self Employed

Nov 2013 - Jan 01 2020

References are available upon request

### Responsibilities

- Advertised to clients and negotiated scope of work via estimates and quotes
- Managed material and site availability dates outlined in scope of work to meet with customer deadlines and expectations
- Met specifications of engineered drawings and communicated layouts and details with designers and architects
- Installation of concrete subflooring, membranes, waterproofing, terrazzo, ceramic, slate, marble, grout, and epoxy at multiple locations in Canada

## EDUCATION

University of Helsinki Full Stack Open 2020

Fundamentals of Web Apps, Introduction to React, Communicating With the Server, Programming a Server with NodeJS and Express, Testing Express Servers, User Administration, Testing React Apps, State Management with Redux, React Router, Custom Hooks, Styling Apps with CSS and Webpack, GraphQL, TypeScript, React Native, CI / CD

MIT / EDX AP® Microeconomics

Consumer theory, Producer theory, Market structures, Market failures, Economic fairness

Georgia Tech / EDX Introduction to Python Programming  
Fundamentals and Procedural Programming, Control Structures, Data Structures, Objects & Algorithms

Certifications
